12TH EUROPEAN NARCOLEPSY DAYS

NARCOLEPSY: TOWARDS AN INDIVIDUALIZED TREATMENT

Dear colleagues, patients, guests and friends,

The 12th European Narcolepsy Days – Towards an individualized therapy which immediately follows the 18th European Narcolepsy MasterClass, is a joint meeting with patients and includes clinical and scientific sessions on narcolepsy and its treatment, lectures on the most recent publications in the field of narcolepsy, pediatric updates, short presentations by young investigators on current research projects, a poster session and a keynote lecture on clinical, pathophysiological and therapeutic aspects of narcolepsy and its socio-economic impact.

Representatives of national patient organizations will host a joint workshop with clinicians and a second session in which questions prepared by patients will be discussed together with physicians and scientists.

Due to the current Covid-19 pandemic and related national and international restrictions, the Board is currently monitoring the situation to define as soon as possible the final format for the event.

The Board strongly desire to keep the usual in-person format and consequently to be able to welcome onsite as much people as possible.

A final decision will be taken in the next months according to the general worldwide situation.

Warm Regards,

Prof. Claudio Bassetti
President of the European Narcolepsy Network
